

Algorithm Performance

Tasks by step

Task 1: DONE

Create a random number generator that can create strings of random numbers in size n.

Task 2: DONE

Print each array

Task 3: DONE

Implement Merge sort

Print og array before sort

Print sorted array second

Confirm the sort is correct

Task 4 :

Implement Quick Sort DONE

Print og array before sort

Print sorted array second

Confirm the sort is correct

Task 5 :

Implement Heap Sort DONE

Print og array before sort

Print sorted array second

Confirm the sort is correct

Task 6 :

Implement Shaker Sort DONE

Print og array before sort

Print sorted array second

Confirm the sort is correct

Task 7:

DONE

Learn how to count comparisons in sorting process, add to each sorting algo

Task 8: Done

Complete driver where each array is being sorted, information is displayed as project requires

Task 9: Done

Results table per project detail
